

Abstract of the Disclosure

A Brush and Method of Manufacture Thereof

5 A brush for cleaning purposes comprises an elongate block
(8), a spigot (10) extending laterally from the block
(8), a handle (2) secured to the spigot (10), a plurality
of outwardly-extending bristles (6) secured to the block
(8), including bristles (6) on a region of block (8)
10 adjacent the spigot, which bristles (6) extend in the
direction of the spigot (10) towards the handle (2).
